Profile

Senior mobile engineer with 7+ years shipping consumer and enterprise apps. I specialise in Flutter and Android, turning product goals into maintainable architectures with strong testing, smooth releases, and thoughtful UX. I excel at cross-platform delivery (iOS/Android/Web), payments & subscriptions, offline-first flows, accessibility, and app performance. Trusted as a code reviewer, mentor, and partner to Product/Design to deliver reliable software products at scale.

Areas of Expertise

- Flutter & Dart, Android/Kotlin, iOS/Swift
- Architecture: Modular, Clean Architecture, SOLID, DI
- APIs: REST, GraphQL, Auth, Payments (RevenueCat), Firebase
- Quality: Unit/Widget/Integration Testing, TDD, Monitoring
- DevOps: CI/CD (GitHub Actions), Release Automation, Feature Flags
- AI-Assisted Development: Claude Code, AI-driven workflows
- Collaboration: Technical Writing, Public Speaking, Mentoring, Hiring

Selected Highlights

- Delivered greenfield Flutter apps using Clean Architecture and near-100% automated test coverage, enabling confident, frequent releases.
- Led cross-platform subscriptions with RevenueCat (iOS/Android), standardising purchase flows and simplifying renewal/entitlements logic.
- Migrated a production networking layer from REST to GraphQL with typed codegen, improving payload efficiency and maintainability.
- Raised engineering quality through CI/CD, structured code reviews, and mentoring of junior and mid-level developers.
- Spoke at community events and published technical content, advocating for accessibility and scalable Flutter patterns.

Relevant Professional Experience

Senior Mobile Engineer

Clipp

Remote, New York, US

10/2025 – 02/2026

- Led mobile engineering efforts to modernise the codebase, adopting best practices in architecture, testing, and code organisation.
- Drove a full UI revamp across the app in collaboration with Product and Design, improving overall user experience and visual consistency.
- Implemented an onboarding dashboard end-to-end, including hands-on backend development with TypeScript and Firebase.
- Built OTP-based authentication flow, integrating secure verification across client and server layers.
- Increased code coverage by developing comprehensive unit tests and establishing testing conventions for the team.
- Adopted AI-assisted development tools (Claude Code) to accelerate workflows and improve engineering productivity.

Stack: Flutter, Dart, TypeScript, Firebase, Claude Code, GitHub Actions

Senior Flutter Developer

Somnio Software

Remote, Uruguay

11/2024 – 06/2025

- Built and maintained multi-module Flutter apps for international clients, focusing on long-term maintainability and clear feature boundaries.
- Implemented cross-platform in-app subscriptions using RevenueCat, aligning entitlement checks, restore flows, and receipts across iOS/Android.
- Partnered with Product/Design to transform requirements into reliable, testable UI flows and robust data layers.

Stack: Flutter, Dart, RevenueCat, Firebase, GitHub Actions

Senior Flutter Developer

Very Good Ventures

Remote, US

02/2024 – 06/2024

- Delivered a full-featured Flutter app from scratch using Clean Architecture and a scalable project structure built for team growth.
- Maintained 100% unit and widget test coverage, complemented by integration tests for critical user journeys.
- Set up CI/CD with GitHub Actions (build, lint, tests), enabling fast feedback and consistent release quality.
- Drove architectural decisions and led code reviews; mentored engineers on testing strategy and idiomatic Dart/Flutter.

Stack: Flutter, Dart, Firebase, GitHub Actions, Clean Architecture

Senior Software Engineer

Remote, US

Superformula

11/2021 – 01/2024

- Owned core features for the MGM mobile app: loyalty program modules, digital key integration via external SDKs, and high-fidelity custom UI.
- Migrated the networking layer from REST to GraphQL with strongly typed codegen, reducing over-fetching and simplifying data access.
- Improved release automation and observability (Sentry, Firebase App Distribution) to de-risk launches and accelerate hotfixes.
- Interviewed Flutter candidates and supported onboarding through pairing and structured reviews.

Stack: Flutter, Dart, GraphQL, Sentry, Firebase, GitHub Actions

Senior Flutter Developer

Remote, US

Go Social

12/2020 – 06/2021

- Implemented location-aware features (maps, geofencing, real-time updates) for an events product with robust permission handling.
- Created reusable widgets/layout components to standardise UX across screens and accelerate development.
- Contributed to open-source packages and internal tooling to share patterns across teams.

Stack: Flutter, Dart, Maps/Location, Firebase

Android Software Engineer

Remote, MX

Justo MX

01/2021 – 06/2021

- Built core modules for an e-commerce app with Jetpack components and MVVM, emphasising reliability and testability.
- Created a reusable UI component library to improve consistency and reduce duplication across features.

Stack: Android, Kotlin, Jetpack, MVVM

Full Stack Developer

Lima, PE

Mandü

03/2019 – 12/2020

- Built Mandü's primary mobile product in Flutter (auth, real-time chat, media uploads) with a resilient backend.
- Implemented GraphQL APIs and used Node.js (Prisma, serverless) to optimise mobile performance and developer velocity.
- Contributed to the admin dashboard using Vue.js and TypeScript to support operations.

Stack: Flutter, Dart, Node.js, GraphQL, Prisma, Vue, TypeScript

Earlier Experience

Flutter Developer – Wibo (Remote, PE)

06/2019 – 12/2019

Delivered a Flutter Web app before stable release; integrated RESTful APIs with secure auth flows.

Mobile Developer – New Transport S.A. (Lima, PE)

01/2019 – 06/2019

Shipped internal Flutter & Android tracking apps for vehicle logging and field data capture.

Android Developer (Internship) – Avantica (Lima, PE)

02/2018 – 12/2018

Contributed to Android apps in an Agile environment (Java/Android SDK); adopted GitFlow and Jira-based tracking.

Open Source & Community

- **GitHub:** github.com/ensoftware — maintainer/contributor of Flutter utilities and samples.
- **Technical Author** at Kodeco (Raywenderlich) — published articles on Android development:
 - *Ktor and GraphQL: Getting Started*
 - *Lazy Layouts in Jetpack Compose*
 - *Testing Android Architecture Components*
- **Speaker:** Accessibility in Flutter (FlutterConf LATAM 2024) — semantic widgets, screen readers, and testing strategies.

Education & Languages

BSc Software Engineering

2016 – 2021

Universidad Peruana de Ciencias Aplicadas, Lima, PE

Competitive programming contest winner; Founder of an Android development community.

English — C2 (Proficient)

Spanish — Native
